

Kvartily pro počty citací v období 2012-2016

V tabulkách jsou uvedeny mezní hodnoty počtu citací pro jednotlivé obory, roky a typy výstupů (article, proceedings paper, review) nezbytné pro zařazení výstupu do kvartilů nebo horního decilu. Kromě toho tabulka obsahuje ve 4. sloupci počty publikací v daném oboru pro daný rok a typ výstupu a v 5. sloupci největší počet citací vůbec dosažený. Tabulka byla použita pro stanovení kvartilů (horního decilu) u výstupů z let 2012-2015 a ve výjimečných případech (podle pravidel popsanych dále) také v roce 2016. V případech, kdy nemáme jistotu v zařazení do určitého kvartilu nebo decilu vzhledem k nízkému počtu citací u mezních hodnot, vkládáme hodnotu kvartilu do závorky (viz pravidla). V pravidlech je používáno označení pro jednotlivé veličiny: počet výstupů v oboru pro daný rok a typ – N, maximální počet citací – Cmax, horní decil - C10, horní kvartil – C25 a druhý kvartil – C50 (počty citací jež, je zapotřebí dosáhnout).

Pravidla pro úpravu hodnot kvartilů s ohledem na robustnost dat:

a) N.A. - výstupy, pro které platí, že počet prací za rok v oboru $N \leq 20$ jsou zařazeny mezi n.a., dále, když $C10 \leq 3$ a výstup byla zařazena do horního decilu (1*), je 1* zaměněna za n.a., dále když $C25 \leq 2$ a výstup byla zařazena do horního kvartilu (1), je 1 zaměněna za n.a., dále když $C50 \leq 1$ a výstup je zařazena do druhého kvartilu, je 2 zaměněna za n.a.

b) Závorky - výstupy, pro které platí, že počet prací za rok v oboru $N \leq 20$ nebo $Cmax < 10$ mají hodnoty kvartilů (decilu) v závorkách, dále pro $N \leq 50$ a při umístění v horním decilu je 1* v závorkách, dále pro $C10 < 10$ a umístění v horním decilu je 1* v závorkách, dále při $C25 < 5$ a umístění v horním kvartilu je 1 umístěná v závorkách, dále při $C50 < 3$ a umístění v druhém kvartilu je 2 umístěná v závorkách. Závorky znamenají nižší spolehlivost výsledku ať už z důvodu malého TC nebo z důvodu nízkých hraničních hodnot oboru.

c) Rok 2016 – všude je n.a. s malou výjimkou. Počty citací pro rok 2016 jsou obvykle velmi nízké, a proto obecně tento rok není analyzován (uvádí se n.a.). Ve výjimečných případech, kdy výstup splňuje pravidla pro zařazení do 1. kvartilu nebo 1. decilu pro rok předchozí, tj. 2015, je místo n.a. uvedeno 1 nebo 1*.

d) Roky 2016 a 2015 – vypuštění závorek ve výjimečných případech. Pokud je pro tyto roky uveden kvartil (decil) v závorkách, může to znamenat, že v oboru jsou nízké meze v daném roce. Pokud je TC vysoké a meze jsou vyšší pro rok 2014, není důvod pro závorky – vypouští se.
