

Časová závislost počtu patentů souvisejících s daným oborem

Z hlediska uplatnění výstupů v praxi je důležitý počet patentů, které odrážejí aplikační potenciál oboru. V databázích patentů lze vyhledávat pomocí klíčových slov, což umožňuje do určité míry odhadnout tento potenciál. Příklad takového postupu je v následujících grafech, kde je zastoupení a časový vývoj počtu patentů, v nichž specifikace obsahuje dané klíčové slovo. Tyto grafy byly zpracovány s ohledem na tlak ve společnosti zohledňovat aplikační potenciál výzkumu. Jejich význam pro související obor nemusí být velký a nutno je brát s velkou rezervou.
